

Declaration of consent for connecting security systems to Securiton's SecuriCloud

Securiton AG supplies, installs and maintains security systems, such as the SecuriFire fire alarm system, which can be accessed remotely by authorized representatives of the system operator and the official partners from Securiton AG using laptops, tablets and smartphones.

The security system is connected to the SecuriCloud only after consent has been granted by the system operator (by means of the present declaration of consent). This is typically done through a one-off, technical activation procedure by the official Securiton AG partner.

The consent begins with the signature of the declaration and ends with a written notice of termination, subject to one month's notice to the end of a calendar month. This declaration of consent automatically becomes void if the security system is decommissioned.

The General Terms & Conditions of Securiton AG also apply.

The system operator hereby consents to the following safety or security system being connected to the SecuriCloud:

Security system

System name:

System number:

Product: SecuriFire.....

System operator

Name

Street / no.

Postcode / city

Place and date

Signature

Enclosures
